

Is Orion Talc Sterile asbestos free?

Orion Talc Sterile contains 5g Talc BP, a white or almost white, asbestos free powder, supplied in a single use bottle that has been sterilised by gamma irradiation.

What is the average particle size of the Talc?

Orion Talc Sterile is made from premium grade talc - predominantly finer than 20 microns. The manufacturer's specification details that only a maximum of 1% are greater than 20 microns.

What is Talc Sterile used for?

Talc Sterile is indicated as a pleurodesing agent used in the treatment of pneumothorax, and malignant and non-malignant pleural effusions.

How is Talc Sterile administered?

Please refer to the User Guide which can be found at www.orion.net.au.
