

Antiseptic skin wash

BIOPREP

4% Chlorhexidine Gluconate (Aust R 131108)

Hand hygiene in particular pre-operative hand wash procedures are critical in operating theatre and surgical environments.

Bioprep is a an antiseptic skin wash for pre-operative disinfection of hands for use by surgeons and operating theatre staff.

Cleansing with Bioprep combines the effects of washing with the antibacterial properties of 4% chlorhexidine gluconate.

Bioprep is packaged in a hermetically sealed bag and box system for easy dispensing through our attractive lotion dispenser.

BIOPREP

Antiseptic skin wash - 4% Chlorhexidine Gluconate Aust R 131108

DESCRIPTION

Bioprep is an antiseptic skin wash for rapid disinfection of transient microbes and skin flora. Bioprep is indicated as a suitable choice for disinfection of intact skin when a 4% chlorhexidine gluconate preparation is the preferred bactericidal agent.

PRESENTATION

For Regular and Repetitive Use

Bioprep formulated to exhibit a mild cleansing and conditioning action on the skin, permitting regular and repetitive use, preventing skin irritation.

Efficacy

Approved by TGA for use as an antiseptic skin wash in a surgical environment.

The Unique Bioprep Dispensing System

Bioprep is packed and supplied in hermetically sealed 750ml disposable pouches, each fitted with its own integral pump. When empty, simply replace the used pouch and cartridge with a new one. The dispenser offers:

- Accurate and reliable dispensing of 1mL of product
- Packaging is not accessible to the public
- Elbow activation option available

DIRECTIONS FOR USE AS A SURGICAL WASH
